

Pattern for a Pika stove.

<http://users.sisqtel.net/losthiker/pikastove/>

Holes are punched with a standard paper punch.

Base is 1-3/16 tall cut from a 12 oz pop can.

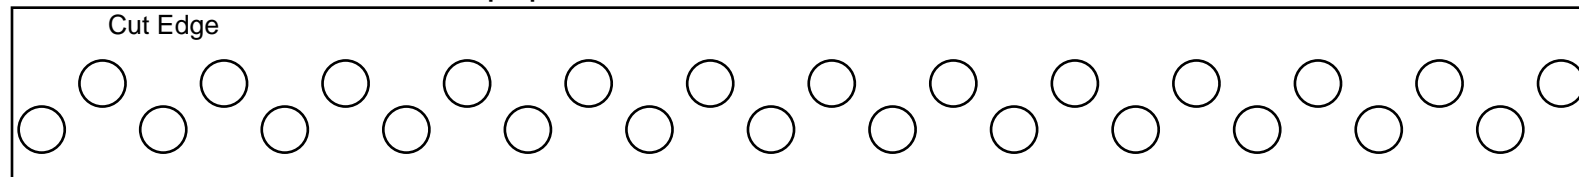

Top is 13/16 tall cut from a 12 oz pop can.

Fuel bowl is 1-3/8 tall cut from a 5 oz juice can.

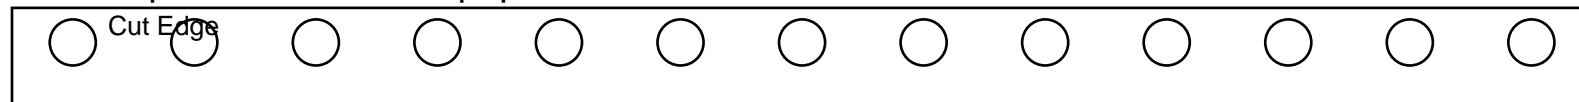

<http://zenstoves.net>

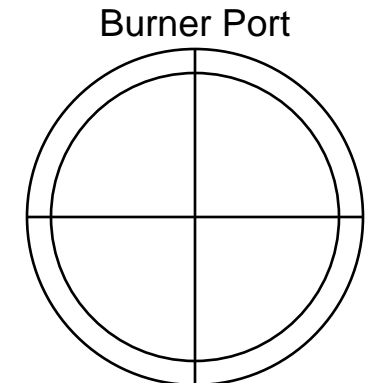

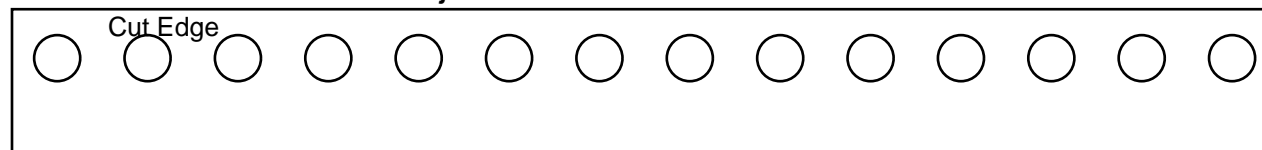

Stove base cut from a 12 oz pop can.

Stove top cut from a 12 oz pop can.

Fuel bowl cut from a 5 oz juice can.

The outer circle fits on the base of a pop can.  
Use it to find the center of the can base.  
(It is sized to fit a Pepsi can. Other cans may vary.)  
The inner circle indicates where to cut the burner port.
