

Drill with a 5/64 bit

Pattern for an Atlanta alcohol stove.

This pattern is made to fit a 3 oz cat food can.

Cut the pattern out, creating a paper strip with 22 marks.

Tape the paper strip around the can with the marks pointing toward the bottom of the can.

The top of the paper strip should be against the bottom of the lip at the top of the can.

The marks indicate where the holes should be drilled.

Drill with a 5/64 inch bit at the bottom edge of the paper strip at each mark.
